

31409

I am looking to understand the Social Care department and how it is structured for service delivery.

Please state the following with regards to business structure questions;

The full name, job title and secretary details of the officer who is both a part of the "Senior Management Team"* and is also responsible for the delivery of child services.

* For clarity the "Senior Management Team" are the direct reports to the chief exec.

Is this person responsible for Adult services as well? If not full name, job title and secretary details of the officer who is both a part of the "Senior Management Team"* and is also responsible for the delivery of Adult Services.

The job title of the people who report directly to this director

At the moment there is no Executive Director for Children and Families so Jackie Irvine, Head of Safer and Stronger and Chief Social Work Officer sits on the CLT to represent C&F (which Bernadette is part of)

Judith Proctor is also on the CLT as Chief Officer, Edinburgh Health and Social Care Partnership.

Bernadette Oxley is Head of Children's Services
Jackie Irvine, Head of Safer and Stronger and Chief Social Work Officer
Judith Proctor, Chief Officer, Edinburgh Health and Social Care Partnership

The number of people employed (full time or full time equivalent) in the directorate or department of children services and separately adult services

We do not have a social care department but we can advise the following:

At Feb 2021:
Health and Social Care Partnership - 2175 FTE
Children's Services - 1248 FTE
Safer and Stronger Communities - 465 FTE

Please provide answers to the following business system questions;

- what is the primary business Application currently used to manage the service (e.g. Mosaic, Framework/i)
- is this system currently inhouse or in the supplier's cloud?
- is this system under review to be replaced?
- if the decision to replace the system has already been made, what will it be replaced to? will it be run inhouse or in the supplier's cloud?
- Do any external agencies like the police NHS interact with child services application (mosaic, framworki...)?

In line with advice from GovCerUK, we do not provide information relating to hardware, software and systems and therefore, unfortunately, it is not possible to provide you with the information you have requested on this occasion.

By placing information about our systems into the public domain we would potentially be putting our IT framework at risk. This would prejudice substantially the Council's ability to effectively carry out its business if its IT framework were compromised as a consequence of the disclosure of this information.
