

35046 Heritage Impact Assessment

Has a Heritage Impact Assessment (HIA) been undertaken with respect to the changes to waste collection arrangements including introduction of communal bin hubs across parts of the City?

If so when was this undertaken and please provide a copy of the HIA and any other associated documents.

A Heritage Impact Assessment (HIA) has not been undertaken with respect to the changes to waste collection arrangements including the introduction of communal bin hubs across parts of the City.

Heritage Impact Assessments do not form part of Scottish planning legislation and there is no statutory basis for them here. As there is no planning application for the changes to waste collection, a Heritage Statement is not required. Should the Scottish Government decide an Environmental Impact Assessment is required, then planning permission would be needed and a Heritage Statement would be requested as part of this.
