

35239 Burnshot Bridge

A recent project delivered a replacement Burnshot Bridge over the A90.

As part of those works, I would like to understand who (i.e. principal contractor (Balfour Beatty); City of Edinburgh Council or other (if so, who) was responsible for the following deliverables:

- Road signage at/around the project site
- Road markings at/around the project site
- The final date warranty date / submission date for snagging related to this project
- What snagging was identified on the road signage and road markings themes, whose responsibility to fix and on what date they were rectified (or remain outstanding)

Road signage and road markings formed part of the scope of the Burnshot Bridge construction contract between the City of Edinburgh Council and Balfour Beatty. The Works were completed on 29th July 2020 and the 12-month defect period ended on 29th July 2021. No contract defects were notified in relation to road signage or road markings.
