

35479 Fuel Types of Licensed Taxis

Please could you list, by percentage, with total alongside, the breakdown of the type of fuel used by the local authorities licensed taxis/cabs/phv currently in operation.

For example:

Electric % (total number),

Hybrid % (total number),

Petrol % (total number),

Diesel % (total number),

Hydrogen % (total number).

A complete list of the vehicles in the fleet can be found on our registers which are available online at:

<https://www.edinburgh.gov.uk/downloads/download/13239/licensing-registers-civic>

Please refer to 'Licensing registers civic' – 'Private hire car' and 'Taxi vehicle'.

We only record limited information on the fuel type of the vehicle to allow us facilitate testing and do not record the fuel type for every vehicle. From this information we currently have:

93 LPG vehicles and 137 all electric vehicles.
