

### 35549 Use of Internet in Schools

Please provide a copy of your council's acceptable use policy for the use of internet in schools by pupils.

I would be grateful if you would send an electronic copy of this policy.

If there are separate policies for primary and secondary schools then please send both of these.

Across the education estate learners are provided filtered access to the internet to support their learning. A Responsible Use Agreement has been created and learners are supported to engage with this agreement and to utilise internet facilities safely, securely and appropriately.

The Responsible Use Agreement is shared with learners and can be accessed electronically from:

<https://digitaleducationteam.com/empowered-learning-downloads/>

Learners can access the Responsible Use Agreement from this location, which is also accessible by parents/carers, alongside the Home School Agreement for One-to One device provision.
