Bonnington Mains Quarry Cliftonhall Road Newbridge EH28 8PW

Request for information relative to the operation of the mineral site at the above address under planning permission ref: P/PPA/LA/643.

Has the Council as Planning Authority ever served a notice of Periodic Review of the minerals permission in accordance with Para 4 of Schedule 10 of the Town and Country Planning (Scotland) Act 1997 (as amended), or a notice of Subsequent Periodic Review under the provisions of the same schedule?

No

If notices referred to in 1 have been served, have applications for periodic reviews of the minerals permission ever been submitted in accordance with Schedule 10 of the Town and Country Planning (Scotland) Act 1997 (as amended), or has the owner or interested parties in the land applied for a postponement of the review date?

The Council undertook a full assessment of all minerals sites as a direct result of the requirements of the Town and Country Planning (Scotland) Act 1997. This was presented to the Planning Committee on March 1997 however, matters were not progressed in accord with section 74 (attached). The applicants at Bonnington Quarry made the first approach with regard to recommencement of extraction before the matter of Schedule 10 was raised. The reassessment of the conditions therefore formed a fundamental part of the determination of the 2017 application (Ref 17/05930/FUL).
