I would like to know how many single mothers have presented as homeless to the council since March 2020 who have stated that domestic abuse was the leading or one of the leading causes of becoming homeless.

We do not have a category that solely relates to 'Domestic Abuse'. We have provided information with regards to homeless presentations by single mothers who have presented due to one of the following reasons. It should be noted that in cases where non-violent dispute with a partner is noted, this may include instances where there has been a relationship breakdown and no domestic abuse.

424 homeless presentations have been made by single mothers due to one of the following reasons between 1 March 2020 and 9 February 2022:

- Violent Dispute – Partner – 228 cases
- Violent Dispute – Parent/Family Member – 9 cases
- Non-violent dispute with partner - 187
