All correspondence, reports and other documents dealing with the colour or shade of bins or bin lids, in light of the communal bin review, and also any images or illustrations showing the colours or shades being discussed.

Please see attached documentation in response to your request. Included is an information board that was used at engagement events, which includes photos of the green lid. An email from the bin supplier with a photo of the darkest green available for their bin lid, and a document with considerations of lid colour.

There is also the Business Bulletin which went to TEC in January which can be found here: https://democracy.edinburgh.gov.uk/documents/s41895/6.1%20-%20Business%20Bulletin_January%202022.pdf

Please note that third party personal information has been redacted from the documents provided. Under Regulation 11(2) of the EIRS, read in conjunction with regulation 11(3)(a)(i), personal data can be redacted if its release would breach any of the principles detailed in the Data Protection Act 2018. I consider that disclosure of this information would breach the first data protection principle, that of fair processing, as it would not be fair, lawful, or expected, for information which could identify these individuals to be released into the public domain in response to this request.

This constitutes a formal refusal notice under regulation 10(3) of the EIRS concerning any personal information which we have not disclosed.

Mitigation measure	World Heritage Site	Waste and recycling Operations	Equality including road safety and accessibility to services	Environment	Economic impact for the Council

Hi Erica

Hope you are well.

Please see attached this is the darkest green that is available.

The glass lid can be black with purple aperture.

Let me know what you think.

Kind Regards

Subject: World Heritage Sites

Hi [redacted],

I wonder if you could help.

We are working with Edinburgh World Heritage to located bin hubs in the New and Old Town of Edinburgh within the World Heritage site and to minimise the visual impact of the bins we have been asked to investigate colours of the bin lids.

While black and grey are ok there is some issues with the green and the purple.

Just wondering if you have available a deeper green for mixed recycling lids.

For the glass it might be possible to have only the flap of the glass bin in purple with the rest of the lid in black. The type of aperture with the holes and the stickers will help residents to have enough information on the type of material the bin accept in the case the flap goes loose.

Any information on the availability and on the associated costs will be much appreciated it.

Erica

How bin hubs will look

We recognise the uniqueness of the World Heritage Site and want to ensure waste and recycling services do not undermine the character of the area but also increase the amount of waste that we recycle.

We are looking at ways to minimise the visual impact of the bins, such as changes to bin lid colours and corral structures to suit the local streetscape.

A.

B.

A. Bins located between parallel parked cars

B. Bins located between end on parking, showing more subtle bin lid

C.

D.

C. and D. Bespoke corraling for WHS

Other measures are being considered, in conjunction with Road Safety and accessibility requirements.
