

### 35729 Waterfront IV Desk Study

I am compiling desktop information for a site known as Waterfront IV, Edinburgh (Site Location Plan attached).

Would Edinburgh City Council have any information pertinent to our investigation such as environmental, mining or historical SI for example?

It would appear from historical mapping that areas of the land of interest have previously been occupied by a gas works, timber yard, mineral railway and a depot. The nature of the depot may have been related to the storage of oil.

Information concerning site investigations associated with Planning Applications 16/00155/FUL, 17/02477/FUL and 19/03245/FUL, associated with land nearby, may be viewed on the Council's Planning Portal at:

<https://citydev-portal.edinburgh.gov.uk/idoxpa-web/search.do?action=simple&searchType=Application>

A report on a site investigation relating to Texaco Oil Terminal, Granton is held. The report was written by Fairhurst Environmental Division and concerns investigations carried out in 1989. This report however is the intellectual property and/or copyright of its originator and cannot be shared

Any information you hold on above ground or underground storage tanks would also be very helpful.

Having completed searches of records for both current and derelict petroleum stores, we have been unable to locate any relevant information.
