

35800 CALA Building Site

I would like to get a copy of the dust emission readings/recordings from the CALA building site at Kingfisher Park, Balerno from April - September 2018.

This was a condition as per Town and Country Planning (S) Acts and “where dust from the operations are likely to cause significant adverse impacts at sensitive receptors, then the operation(s) shall be suspended.”

There are no such dust emission readings held. The Planning Application number is assumed to be 15/05100/FUL – Land 150 Metres South West Of 28 Newmills Road, Balerno. There is no Planning ‘Condition’ on this approved scheme to record dust emissions but an ‘Informative’. Informatives are used to advise of good practice and additional matters to note, but do not carry the same limitations as Planning Conditions do.

Could I also have a record when they ‘suspended’ any operations?

We hold no record of any operation suspension.

What official action was taken for works continuing whilst breaching this and also for works starting prior to the issue of planning permission?

No such actions were taken by the City of Edinburgh Council.
