

35840 Road Defect & Repair History

I am looking to ascertain specific details regarding road defects / potholes at the junction of Calton Road and Abbeyhill throughout 2020 and 2021.

Please can you provide me with records showing when defects or potholes have been identified and when they were repaired, as well as any relevant proof of repair?

Please refer to the attached Site History Report.

Any reported defects identified through carriageway inspections are included in this report. Similarly, each customer report received is inspected and, if an actionable defect is identified by the Inspector, this defect would be raised and be included in the Maintenance Management section of the Site History Report.

Please note that redactions have been applied where the information is not within scope of your request, i.e. where it is clear that it does not relate to the specific part of the carriageway described in your request.
