

35923 Hampton by Hilton Hotel at Edinburgh Airport

I am currently completing a desk study for a proposed development site located adjacent to the Hampton by Hilton Hotel at Edinburgh Airport. Site location plan to follow by separate e-mail. A review of historical information has indicated historical tanks on site and in the surrounding area.

In particular, I would like any details on underground fuel storage tanks on site and their decommission as well as a tank noted 85m north of the site which may be associated with the airport control tower?

Having completed searches of records for both current and derelict petroleum stores, the following information was identified:

1 x 5,000-gallon tank sunk in 1987 part of the Swan National/Europcar Car Rental site adjacent to the police station on Almond Road/Almond Avenue, Edinburgh Airport.

2 x 10,000-gallon tanks double skinned, double compartment were sunk in 1997, further north along Almond Road at the former Eurodollar Car Rental site but this may be outside the zone indicated on your request.

I have attached some images of maps to assist your request.
