

36746 Lauriston Castle - Japanese Garden Lighting

In relation to the Japanese Garden situated in the grounds of Lauriston Castle Trust Estate when did the lighting and security cameras stop working and when will they be made fully functional again?

The specific dates requested are not recorded. Our records show that the lighting stopped working in 2019/20 but we understand the cameras are still operational (albeit, without the lights they are unable to pick up any issues after dark).

In terms of when these will be repaired, the cost of repair/replacement is being investigated. There was some investigation of costs done prior to the outbreak of Covid-19 but the work was put on hold. A new investigation will take place shortly to see if we can repair the lights.
