

36813 Household Waste and Recycling Collection

Can you please provide a breakdown of spending per household on waste and recycling collection.

Can this be divided by households who receive individual collections and those who use collective bins.

Could you include figures for the whole CEC area and break down by Council ward.

Please also include spend per household on those who receive 'gull proof' bin bags.

For households receiving individual collections, the estimated cost per household is £24.28 per annum.

For households with collective bin collections, the estimated cost per household is £22.15 per annum. Following the Communal Bin Review, the estimate rises to £25.22 but will include those households who had Gull-proof sacks.

For households with Gull-proof sack collections, the estimated cost per household is £34.97 per annum.

The whole city costs are estimated as £2,924,240 per annum, rising to £3,387,576 following the Communal Bin Review.

We are unable to provide the information broken down by Ward as it is not held by the Council. This information is not centrally recorded and as some of the collection routes cross more than one Ward, it is not possible to accurately split costs per Ward.
