Please provide the Road Safety report for Lanark Road Edinburgh today 26-04-22 moved parking opposite side of the road.

A Designer Risk Assessment and Stage 3 Road Safety Audit were performed on the full length of the measures, please find attached. There is no specific 'Road Safety Report' carried out for the recent change which was implemented to improve safety in response to reports of both near misses and collisions from members of the public.

Where is the safety for people for this change?

The changes were brought about due to reports of near misses and collisions from members of the public as mentioned previously.

I also want to know total cost of spaces for people on Lanark road including today's change how much tax payers money has been spent on the road.

The cost of all of the Travelling Safely (formerly Spaces for People) measures was funded from the Scottish Government Spaces for People fund which was specifically allocated to Local Authorities to introduce these type of measures.

Total cost of measures - £82,919.00    Total cost of recent changes - £3,085.00
