

37156 Road Maintenance Records - Colinton Mains Drive

I would like the following information relating to road maintenance or capital works as appropriate:

Street Name - Colinton Mains Drive (in its entirety)

Information requested;

Date of footway construction (full length, both sides) i.e. how old is the footway-pavement construction?

Date of carriageway construction (as above).

We do not hold records of the original construction of the footway. We have records showing some of the north footway at Oxfangs Road North being repaired in 2014.

We do not hold records of the original construction of the carriageway, but we have records indicating that the bus stop outside Nos. 152-158 was reconstructed in 2016.

Date of last inspection of footway over its entire length (routine inspection, not as a result of a Clarence report).

Capital Assessment - The footway was last inspected for capital work in November 2018.

Safety Inspection – 14/12/2021

Date of last inspection of carriageway (as above).

Capital Assessment - The carriageway was last assessed for capital work in June 2021.

Safety Mobile Inspection – 04/05/2022

When the footway and carriageway is scheduled for resurfacing in its entirety.

The footway is currently on the draft 2023/24 Capital Footway Programme. The carriageway does not feature on the current 3-year Capital Programme. Both of these are subject to change after new survey data is captured and used to produce new work programmes.
