

37239 4 Station Brae, Portobello

We are currently undertaking desktop study research for a site located on unused land at 4 Station Brae, Portobello, Edinburgh EH15 1LQ (Grid Reference 330223, 673550), I have attached a plan showing the site location for your reference.

Can you confirm if the council hold any records of potentially contaminative land uses for this site or in vicinity of the site.

Historical mapping indicates that Portobello railway station, sidings and goods yard was located offsite to the north of the site of interest with the station house being located on the eastern part of the site. It is understood that the site has been used more recently as the yard of a construction company with cars and lockups on the site also. No further information is held.
