

37243 Applying to Foster

Can you supply a copy of the paperwork in relation to medical questions asked of somebody applying to foster?

All prospective Foster Carers are required to complete full Adult Health Medicals as part of the assessment process. The first attached document – '37243 AH Medical Form', is the medical form that was adapted for use for applicants during the pandemic and the second attached form - '37243 Form AH Adult Health Report', is a revised version that we have recently received from BAAF suggesting this be used going forward. There is a meeting planned to review the updates of the second form and it is anticipated this will be the revised form that will be used going forward.

Once the forms are completed and returned by the applicant's GP, this is sent to our independent medical adviser for review / sign off.
