

37367 Builyeon Road, South Queensferry

Can you please advise me if funding for the provision, construction and future on-going revenue operating cost of a new primary school at the new housing development at Builyeon Road, South Queensferry is currently included in CEC Capital and Revenue budget programmes for future years?

In which financial years have budgets been allocated?

The current approved Capital Investment Programme includes provision for the construction of a new primary school at Builyeon Road, South Queensferry in the 2023/24, 2024/25 and 2025/26 financial years. These years are the current estimate of when a school may be delivered. However, the exact timing of construction may vary and will only be known once the detailed design and procurement stages of the project have been completed. On-going revenue costs are factored into future revenue budgets for all new schools as required.
