How many electric vehicle charging points have been installed in the local authority to date?

The Council has installed a total of 62 publicly available chargers (serving 116 charging bays) as of 28/06/2022.

How many electric vehicle charging points does the authority plan to install in the next 12 months?

The Council is rolling out two phases over the next 12 months which will see a further 82 publicly available chargers (serving 149 charging bays), and 37 chargers (serving 74 charging bays) for the use of car club vehicles.

How much does the council plan to spend on installing electric vehicle charging points in 2022/2023 (as GBP and as a percentage of overall budget)

The Council is proposing to spend approximately £1.7m in 2022/23 to install chargers. This spend is funded externally and not part of the Council's budgets.
