

### 38933 Response

I'm looking to request information regarding the amount of contaminated land within your area as of now (21/09/2022).

- How many sites in your area are contaminated?
- What area in square meterage does this cover?

No sites have been identified as contaminated land within the context of Part IIA of the Environmental Protection Act 1990.

This information is available on our website <https://www.edinburgh.gov.uk/pollution/land-contamination/1>

Should any land be identified as contaminated land, details will be placed on a register as required by the legislation which will be available at our offices and online.
