Regarding abandoned vehicles in Edinburgh

How many were reported as abandoned between October 2017 and September this year?

If you could please provide a month to month breakdown of reports and confirm what type of vehicles they were (e.g. cars, vans, motorcycles), plus how many vehicles ended up getting uplifted, it would be much appreciated.

Please see requested information below with the exception of vehicle type. All reported abandoned vehicles are logged under the same category code and there is no way of identifying the type of vehicle without reading each record individually. This task would take approximately 289 hours.
