

46513 Household Waste Bins

What percentage of household waste bins were collected on time in 2022-23?

How many household waste bins were collected late in 2022-23?

We do not record the percentage of household waste bins collected on time, or the number of individual bins collected each year.

How many different types of household waste bins (e.g. plastic recycling/general waste/paper recycling/garden waste) are collected by the council?

There are seven different types of waste streams collected in containers: Dry Mixed Recycling (DMR) collections which includes paper, card, plastic, cans, etc.; Garden Waste and Residual Waste. Glass is collected in a box and Food Waste collected in food caddies. We collect Residual Waste from Gull-proof sacks. Another collection of Recycling is being introduced in Gull-proof sack areas.
