

55031

The total cost of repairs due to vandalism in all schools within your local authority area for each of the last five financial years (2019/20, 2020/21, 2021/22, 2022/23, and 2023/24).

A breakdown of costs by year.

If possible, a brief description of the types of vandalism incidents recorded, if this information is readily available.

Unfortunately, we are unable to provide you with the information requested because it is not held by the Council.

Having reviewed the information available from our schools, unfortunately vandalism is not consistently recorded. We cannot differentiate between accidental damage, vandalism and possible wear and tear in every case of recorded damage. Whilst acknowledging the importance of recording the true cost of vandalism, it is not currently recorded in a manner which enables accurate data to be collated.
