

55237

The number of dropped kerb installations completed in financial year 2024-2025 under the 'rolling programme' for dropped kerbs.

25

The current estimate on number of missing dropped kerbs in the city.

The most recent city-wide audit of dropped kerbs in Edinburgh was carried out in 2016. This recorded 7,827 locations with missing dropped kerbs. The current number of locations without dropped kerbs will be less than this, as the Council has an ongoing programme of dropped kerb improvements. In addition, drop kerbs are introduced, where missing, as standard practice for infrastructure improvements undertaken as part of the Council's extensive Capital Improvements and Capital Maintenance Programmes.
