

55594 Local Environmental Audit and Management System (LEAMS)

In the Street Cleansing Performance Report to the Transport and Environment Committee meeting held on 12 December 2024, reference is made to LEAMS monitoring undertaken by Keep Scotland Beautiful on behalf of the Council. It is stated that on the basis of this monitoring, performance had improved between 2021/22 and 2023/24.

Please can you provide a list of the streets that were inspected in each of these years, the dates of those inspections and the results of the inspections for each street.

Please refer to the attached spreadsheet, "LEAMS 2021-22 to 2023-24", which provides data for three years.

Please note the following:

There were changes to the attributes collected over this time, particularly in 2021/22 when there was no Electoral Ward, survey type, automatic KPI grade calculation, PPE item count, dog fouling 1000m², or SIMD quintile added.

The streets, dates and LEAMS results show for every entry though.

When will the data for 2024/25 be reported?

The data for 2024/25 is now published on the Keep Scotland Beautiful website at:

<https://www.keepsotlandbeautiful.org/local-environmental-audit-and-management-system-leams/>

The City of Edinburgh Council results are shown in 'Club 4 street cleanliness score %' at the foot of the webpage.

Do you have a list of streets and dates of inspection for those included in the 2024/25 monitoring?

Please refer to the attached spreadsheet, "LEAMS 2024-25 streets and dates", which provides the dates and street names of those surveyed in 2024/25.
