

55732

For each of the past five academic years (2019/20 to 2023/24), please provide the following information:

Whether your local authority holds any records, estimates, or reports on the number of children entering Primary 1 who were not toilet trained (e.g. still wearing nappies, unable to use the toilet independently).

We do not hold this information.

Any communications received by the local authority from schools or headteachers regarding concerns about toileting issues among new P1 pupils.

We do not hold this information.

3) Any guidance or procedures issued by the local authority to support schools in managing situations where pupils begin P1 without being toilet trained.

We do not hold this information. However, we would refer to <https://eric.org.uk/wp-content/uploads/2022/10/Managing-Bowel-and-Bladder-issues-in-nurseries-colleges-and-schools-2022.pdf> for guidance. We have never been approached to support a school re a P1 not being toilet trained unless they have had additional support needs which impact on this. Where this is the case, they would follow the healthcare planning procedures outlined here.

[ASL health care planning – The City of Edinburgh Council](#)

If held, any records of complaints, concerns, or queries raised by P1 teachers to school leadership or the council in relation to toileting issues at school entry.

None
