Parking surveys and related information and communication as it pertains to the Fettes CPZ

Parking surveys and related information and communication as it pertains to the Fettes CPZ proposal and the statement that “we carried out parking surveys to identify where problems were present. Having identified parking pressures in Priority Parking Areas (PPAs) B1, B4, B5, and in the Fettes area, we asked for public feedback, which told us that residents can struggle to find parking near their homes, and that there are issues with long-term parking of non-resident vehicles and inconsiderate or dangerous parking.”

This information can be found in a [report](#) to the Transport and Environment Committee from December 2022.
