## Highways and Road Asset Management System

What software or system does your council currently use to manage highways or road asset management (including carriageways, footways, street lighting, and drainage infrastructure)?

Specific details on hardware, software and systems used will not be provided. By placing information about our systems into the public domain we would potentially be putting our IT framework at risk. This would prejudice substantially the Council's ability to effectively carry out its business if its IT framework were compromised as a consequence of the disclosure of this information.

Who is the provider of this system (e.g., Confirm, WDM, Symology, Alloy, or other)?

These services are provided by CGI as part of our outsourced ICT contract.

When was this system implemented?

Specific details on hardware, software and systems used will not be provided. By placing information about our systems into the public domain we would potentially be putting our IT framework at risk. This would prejudice substantially the Council's ability to effectively carry out its business if its IT framework were compromised as a consequence of the disclosure of this information.

How long is the contract for?

Up to 19 years

When does the contract end?

The contract with CGI is currently due to expire on 31/3/29 but can be further extended to 31/3/35

What is the estimated annual cost or licensing fee for the system (if available)?

Spend is within our annual ICT Contract costs of circa £26m per annum, the charges are not structured in a way that we can report spend for these specific areas as a standalone value.
