I am contacting you in regards to your request for bins to be placed in the community park.

I am afraid to say that the council will not be placing any further bins in the park. This is because of the Health and Safety Issues raised by doing so.

The Council has been removing bins from within play parks over the past few years and have reinstalled them at the entrances and exits to the parks.

I was with the contractor on a walkabout regarding the placement of the bins and they were installed as I said at the entrances and exits so no vehicle needs to go into the park.

Subject: RE: 2024.08.27 CF-BC R2UC TQ Meeting Summary

Good afternoon xxx,

Apologies if this is an oversight on behalf of the project team. The designer has just recently asked me to confirm the positioning and type of bins that the Council would like on the route – hence me contacting you. There would have been bins in Dalry Community Park pre-construction, and these will simply be replaced.

As for the rest of the new route – would we as a council not provide bins on a route that will hopefully be well used by peds and cyclists? However, I apologise if this should have been run past you earlier than this.
