

56378 Warriston Cemetery - Shared Parking

At the entrance to Warriston Cemetery there is 'shared access' car parking for both cemetery visitors and residents of the private road. Part of this parking area has now been assigned to the residents only, with a lockable folding post.

I would like to know the reason for this public space being allocated to private residents to the detriment of the public.

The space has not been allocated to a resident. The residents of both houses have accrued the right to park over many years and we have decided not to allow anyone to park there, other than the residents or when we drop the barrier for a funeral.

Bereavement Services team have advised they are unable to comment because there is an on-going legal proceeding. I would also like to know the nature of that legal proceeding.

There are no on-going 'legal proceedings'.
