

56380 Straiton Park-and-Ride (South-East Spur) Drawings, Audits & Closure Reports

I wish to inspect information held by the City of Edinburgh Council concerning the south-east spur of Straiton Park-and-Ride (the paved loop south east of the main car-park and roundabout).

Please supply, in electronic form, the following:

As-built or record drawings for Straiton Park-and-Ride that cover the spur in question, including general arrangement, levels, kerbs, vehicular tracking and drainage layouts.

The Stage 3 Road-Safety Audit, design risk register and audit response report prepared for the completed site (circa 2007–2009), plus any subsequent safety-audit reports that specifically reference the spur.

Documents, memos or reports that explain why the spur is currently closed to the public. In particular, any structural-defect, pavement-condition, drainage or contamination reports that led to (or record) the decision to barrier off the spur; and any correspondence with the Roads Authority or contractors on that issue.

Current traffic-management or closure orders (if any) that legally restrict public access to the spur.

The Road Safety team hold archive records of any Road Safety Audits undertaken in terms of the Council's RS 02 RSA - LIAISON GUIDELINES, which are archived in line with Council's Policies for a period of 21 years. However, there are no records concerning Straiton Park-and-Ride for the period 2007–2009.
