Could you please let me know how much it has cost the council, so far, to put up hired road closure signage on Whitehouse Loan, between Warrender Park Road and Bruntsfield Crescent?

The road closure infrastructure on Whitehouse Loan between Warrender Park Road and Bruntsfield Crescent was installed in February 2021. The Council then paid a monthly hire charge for the equipment between February and November 2021. After this time, the hire charge was waived by the supplier and the only costs incurred from then onwards were for regular weekly maintenance visits.

The total installation and hire charge costs incurred between February and November 2021 were £24,162.

It is not possible to provide the cost of the maintenance visits since November 2021, as these formed part of a wider programme of maintenance visits to similar temporary measures at various locations across the city. A single monthly charge was paid for these maintenance visits and it is not therefore possible to disaggregate costs for individual measures.
