

56721

Please provide the most recent available data, for instance, from the last calendar or financial year, for your local authority area, on the following:

Playgrounds

- The total number of publicly owned and managed playgrounds.
- The number of these playgrounds that are accessible to children with disabilities (e.g. inclusive play equipment, wheelchair access, sensory-friendly areas).

The Council currently recognises 172 distinct playparks within its playpark estate.

- Accessibility for children with disabilities
 - 134 playparks have a fully bounded safety surface (wetpour, carpet, or matting), which enables wheelchair access.
 - 19 playparks provide a combination of bounded surface and loose-fill material (bark mulch or sand), offering partial accessibility.
 - 19 playparks are surfaced exclusively with loose-fill materials, which do not provide easy wheelchair access.

As part of our ongoing commitment to accessibility, when loose-fill surfacing reaches the end of its service life, we aim—subject to budget—to replace it with a bounded safety surface. While accessibility guidance is incorporated into all new playpark designs, we do not currently classify playparks, equipment, or environments as “inclusive.” Manufacturers may market equipment as inclusive; however, we do not formally record this information, as it may be considered a subjective assessment rather than an objective measure of inclusion.

Public toilets

- The number of public toilets there are in your area
- The number of accessible toilets (e.g. wheelchair accessible or ambulant) there are in your area

There are 20 public toilets across the City, 14 of which have wheelchair accessibility.
