

56813 Warriston Cemetery

I have become interested in the use of photography and storage equipment by council staff during recent visits to Warriston Cemetery.

I have not been able to observe a privacy notice in the vicinity of Warriston Cemetery so I presume the online document is how the council are currently communicating this data collection and processing to users of the cemetery.

Request:

Can you confirm whether the council is engaged in the photographic documentation of users of Warriston Cemetery and if so, for what purpose?

Can you confirm how such information is being stored and transferred?

Can you confirm the retention period for such information?

There is no photography of cemetery users at Warriston Cemetery; there is a wildlife camera in use at night and there are notices advising of this. No members of the public have been captured on the wildlife camera, and no images are retained.
