

57214 Street Trader's Licence Details

I wish to request to see all communications and documentation between the parties involved in the application and granting of this licence, more specifically licensing enforcement and roads and the street trader. Any discussion about being on a 100% residential street and also any communication regarding the public notice that was meant to be displayed so that the public had a chance to object.

The licence was granted in circumstances where internal consultees raised no concerns or objections - there is no operational need to record a licence was granted or why no concerns or objections were raised nor to record any consideration of the points you raise. The Council systems simply record a code which when generated grants and prints the licence.

In terms of Licensing Enforcement, the Council has in these letters and discussions provided you with an explanation of the Council's powers and the steps that have been taken to address the concerns that you have.

Information between the Council and Licensing Enforcement is refused. To release any information beyond the explanation that you have already been provided would affect the Council's ability to investigate and enforce the legislation. To release any information provided by the licence holder might adversely affect their willingness to cooperate with enforcement advice and instructions and therefore would not be in the public interest. The Council could also be placing at risk any possible future enforcement action if this information which might be relied upon was placed in the public domain.
