

57376

Request for information regarding secondary teaching vacancies advertised in your authority since 1 January 2020.

Specifically, I am seeking information on all advertised vacancies for the following subjects:

- Business Education
- Computing
- Technological Education (including derivative titles such as Technical, Craft and Design, Technologies, Technological Studies, etc.)

For each vacancy, I would like to request the following details (where available):

- The school name.
- Whether the post was full-time or part-time.
- Whether the post was permanent, temporary, or fixed-term.
- The number of applications received.
- Whether the post was successfully filled/appointed.
- If the post was not filled, whether it was subsequently re-advertised.

Please see the attached document noting the following:

- The information relating to vacancies between January 2021 and May 2025 has come from our Recruitment System. Note: this system does not hold all the information requested.
- We stopped using this system in May 2025, so vacancy information post March 2025 is coming from a different source and again does not hold all the details being requested. The overlap of timing is due to a phased rollout and any duplication has been removed.
- We do not hold any of this information prior to January 2021.
- We do not hold the details of part time or full time on the old system but do hold it on our current system.
- We do not hold the information about number of successful candidates for each post on either system.
