

57441 Trams from Granton to the BioQuarter and Beyond

What is the distance between the proposed tram stop on Telford Path for The Western General Hospital and the Department of Oncology in the hospital?

Whilst the project team considered tram stop locations and access to the hospital, no specific measurement to the Oncology department was taken. According to Google maps this is approximately 600m. To note, in the consultation the project states that the distances from a potential tram stop on Crewe Road South is c. 100 metres to the entrance of the Western General on Crewe Road South. It also states that the distance from Roseburn Path to the western entrance of the Western General on Telford Road is approximately 200-250 metres. Please see our web pages at:
