

57666 Trams from Granton to Edinburgh BioQuarter / Royal Infirmary

Trams from Granton to Edinburgh BioQuarter / Royal Infirmary of Edinburgh and beyond.
Report 04.

Structures report for the Roseburn path. Reports have been made available for the Dean Bridge, North Bridge and South Bridge. But no structures reports have been made available for the structures on the Roseburn path, i.e. The Roseburn Terrace Bridge, and the bridge over the water of Leith.

Please can you send me all the structures reports available for the proposed trams route along the Roseburn Path?

We can confirm that reports have been made available for the Dean Bridge, North Bridge, and South Bridge. However, there is no overarching report for other structures on the North-South Corridor in relation to the proposed tram route. The assessment of these structures was carried out using Council maintenance records via a desktop review, as they were originally constructed to serve heavy rail. Therefore, no further work or detailed reports are available at this Strategic Business Case stage.
