

57993 Temporary Accommodation

The duration of the longest stay in temporary accommodation for any household (of those currently in temporary accommodation)

3,565 days.

The duration of the longest stay in temporary accommodation for any household with a child in it (of those currently in temporary accommodation)

3,565 days.

The number of disabled people who are currently in temporary accommodation following a homelessness application made to your local authority

Please note we do not have a defined disability flag that is consistently used by all staff members working within homelessness services. Instead, Housing Officers primarily include details of health issues within a notes field. Data has therefore been gathered as accurately as possible from the 'health' case notes field, with the assumption that this is referring to individuals with a physical disability.

51 households.

The number of disabled children who are currently in temporary accommodation following a homelessness application made to your local authority

10.

The number of disabled children who are currently in hostel or b and b accommodation following a homelessness application made to your local authority

0.

The duration of the longest stay in temporary accommodation of a household with a disabled person in it (of those currently in temporary accommodation)

2,087 days.

The duration of the longest stay in temporary accommodation of a household with a disabled child in it (of those currently in temporary accommodation)

1,830 days.

26.

The highest number of times a household has been moved to different accommodation while in temporary accommodation for any household with a child in it

Please note the below figure is for households currently accommodated in temporary accommodation.

18.

The longest time a household has been on a council house waiting list (if the list is administered by your local authority)

The application that has been registered the longest has been registered since 01/02/03. This does not indicate whether the client has homeless priority.

The average amount of time a household with children spends on a council house waiting list (if the list is administered by your local authority)

Between 01/10/24-01/10/25, the average waiting time an application with children on it had when housed was 6,160 days. Again, this is an average of clients regardless of priority.

The number of complaints/ service requests made to your local authority about the standard of temporary accommodation

There have been 111 complaints in the last year that have specifically mentioned issues with temporary accommodation standards. This includes PSL, B&B, dispersed flat, and shared house accommodation.

A summary of the 5 most common subjects of service requests or complaints made to your local authority made by households staying in temporary accommodation

Where temporary accommodation is recorded in the complaint, please refer to the table below, which provides the ranked complaint types.

Complaint Type
Service Delivery
Employees
Policy
Contractors
Communications
