

58069 Pest Control Contracts

A list of all pest control contracts currently held by the Council, including:

The names of contracted service providers

The scope of services covered (e.g. rodent control, insect treatment, bird-proofing)

The start and end dates of each contract

The total value or estimated annual spend per contract

A breakdown of pest control services provided to:

Council-owned residential properties (e.g. high-rise blocks, sheltered housing)

Public buildings (e.g. schools, libraries, community centres)

Any third-party managed sites under Council oversight

Any internal policies or service level agreements (SLAs) relating to pest control response times, resident reporting procedures, or contractor performance monitoring.

If possible, I would also appreciate any recent reviews or audits of pest control effectiveness or resident satisfaction

All Council-owned properties are serviced by our internal Pest Control Team, and therefore no contract exists.
