

58148 Traffic Regulation Order 25/17

TRO 25/17 invited comments in a three-week period ending on September 12th.

How many comments were received?

We invited comments from Statutory Consultees only, but the relevant Notices were published such that anyone could view and respond. We received eleven comments from members of the public and no comments from Statutory Consultees.

Will the comments be provided for councillors at their June 2026 TEC meeting when TRO 25/17 will be reviewed?

No.

Comments for TRO consultations are considered by the TRO Sub-Committee as part of considering whether to make a scheme permanent. The six-month period of public consultation on TRO/25/17 for the revised scheme will commence in early 2026 and comments from this public consultation will be considered by the TRO Sub-Committee before deciding whether to retain the scheme on a permanent basis following the 18-month period of the ETRO. However, members of the Transport and Environment Committee will be presented with the results of the traffic monitoring of the revised scheme in June 2026. Depending on the results of this monitoring they may decide to further revise the scheme, and this would trigger a new six-month period for public comments.

Please let me see all the comments now.

The comments received in relation to this TRO are attached.
