

58281 Cammo Walk - Safe Walking Route

Can you please advise when a safe walking route will be available for public use that goes over the Bughtlin Burn connecting David Wilson homes site to Cammo Walk?

Please provide the commencement date of works and proposed completion date.

Work is currently underway on progressing a new Active Travel route between the development and Cammo Walk, including the provision of a new walking and cycling bridge across the Bughtlin Burn.

We cannot currently provide firm dates for the commencement or completion of delivery of the route, as this is heavily dependent on the outcomes of several statutory or legal processes that have yet to be undertaken, including ecological surveys, obtaining Planning Permission for the new bridge and acquiring land that is not currently within the Council's ownership.

We currently expect that the earliest that work could commence on delivery of the route would be in summer 2026. However, construction dates could be impacted by requirements arising from the planned ecological surveys, such as restrictions on construction work during bird nesting season.
