

58311 Conservation and Design Team

I would like to request the following information:

If your Council has a Conservation and Design team of any description, that is consulted on Planning Applications involving constraints such as listed buildings and conservation areas, and what this team is called.

Yes - Specialist Team and Major Development Team.

If 'yes', what training or qualifications, if any, are prerequisites for an officer working in this team?

Across the services, we have several staff with specialist qualifications in architecture, conservation and urban design. As part of the application process, we will determine if a specialist qualification is required.
