## Street Cleaning - New Town and Broughton Community Council Area

Will the City Council please produce a document, or documents, providing the information set out below:-

A list of all of the streets, roads, crescents, lanes, loans, circuses and other public highways which fall within the area covered by the New Town and Broughton Community Council to which the Council is obliged to provide street cleaning services together with:

A schedule(s) setting out the frequency with which each street, road, crescent, lane, loan, circus or other public highway in the New Town and Broughton Community Council's boundaries is cleaned, swept, weeded and litter picked by a street cleaning operative or operatives.

Streets in the attached list are inspected on the frequency in the spreadsheet and are swept or litter picked as required in line with the Code of Practise on Litter and Refuse. Weed removal is not a statutory function of the Council therefore these are removed on an adhoc basis (there is no set frequency for weed removal).

A schedule setting out the frequency with which each street, road, crescent, lane, loan, circus or other public highway in the New Town and Broughton Community Council's boundaries is inspected by a manager or supervisor in the service of the Council to determine if street cleaning services are required and if street cleaning services are achieving the Council's benchmark standards and 'value for money' to the Council Tax payer.

Supervisors carry out spot checks on the work of the crews and barrow beats on a daily basis to ensure standards are maintained.
