

58699 Lamp Post Installation - Ravelston House Park

There has been a lamp post installed in our back garden. The code number is WEP05. The street address is EH4 3NP.

We have no record of any easement, servitude or wayleave for this lamp post. Please provide the wayleave agreement with the local residents for this location (West Court, Ravelston House Park, Edinburgh, EH4 3NP).

The City of Edinburgh Council has been unable to locate a wayleave agreement for the streetlight (ref: WEP05) at West Court. It is assumed that the asset was put forward for adoption by the housing developer, along with the other streetlights in the area, under Road Construction Consent, ref. RCC ED/67/0013.

Please provide all and any records pertaining to the lamp post, including date of installation, manager in charge of installation, whether any councillors were involved in arranging the installation, correspondence related to the installation, consultation with residents about the installation, any resident permissions given for such. and any other pertinent information relating to it.

As above, there are no records held in relation to the original installation. The City of Edinburgh Council has not retained any information relating to RCC ED/67/0013, which was developed in the 1960s. The original concrete column, which was installed in the late 1960s, was replaced by the City of Edinburgh Council, with the existing aluminium column, in June 2009.
