Please provide the following information regarding Bankhead depot:

The total number of EV chargers installed

Five charging units all with double sockets.

The power rating of each EV charger

The power rating for each publicly available charge points at Bankhead Depot are:

1x 22kW AC charge point with 1x charging bay.

1x 50kW DC charge point with 2x charging bays.

For council vehicles

1 x 7kw AC

4 x 44kw AC

The type of vehicles used for each EV charger

The publicly available charge points are available to all drivers with electric vehicles.

All chargers are utilised by Council operated cars and light commercial vans.

The number and type of EVs that charge at the depot

The Council does not hold records of members of the public and their vehicle types using the publicly available charge points.

There are 15 council EV vehicles based at the depot, 5 cars and 10 vans that charge there.

The number and type of non-EV vehicles that visit the depot

We do not hold this specific information. There are a variety of differing non EV vehicles that visit the depot including vans and trucks of various applications such as road gritting, refuse collection, sweeping etc. This is because the site is a dedicated fuel station for the fleet and is one of the maintenance facilities for the fleet.
