

59021 Fencing at James Court

I would like to find out about the fencing that has been erected in James Court to block land that is part of the Writers Museum. The decision making process in erecting this fencing as opposed to fixing the lock on the gate the fencing is blocking access to. How long is the fencing expected to remain in place and what considerations have been made to replace it?

The Road Occupation team were unaware that the fencing described had been installed. Officers visited the site following your request and could find no project/contractor contact information. However, the Council will attach a notice to the fencing, asking that those responsible for the fence contact us to discuss this unauthorised occupation.
