59083 Facial Image Recognition Facilities

I would like to find out if Edinburgh Council has implemented live and/or still facial image recognition facilities on council operated cameras in public settings please?

If facial recognition/biometrics is in place - what database does this tie in with?

What organisation are the facial images/videos shared with?

How long are images/videos saved for?

Is any form of AI involved?

There are no facial image recognition facilities on any Council-operated cameras within our public spaces.
