The dates of the last 2 surveys for Falcon Road West?

The last two survey dates for Falcon Road West are 13th June 2021 and 13th September 2025.

What the condition of Falcon Road West was assessed to be (Red/Amber/etc)?

The result of this assessment is that this road would fall into the red category.

What Falcon Road West's prioritisation score was after those surveys, and as an individual score will be fairly meaningless, where that score ranked in the Edinburgh wide assessment?

The scores assigned to the carriageway see it placed approximately 145th out of all of Edinburgh's unclassified urban streets that fall into the red category.

If practical, I would also like to see a sample of the detailed road assessment provided to the council by Scottish Roads Maintenance Survey for Falcon Road West.

Please see the attached.
